

# SoundLab: Electronic Music STEM @ Tremont

Taught by the "Robot Guy"  
from Robot Academy

Grades 2-5

\$140 for 7 Weeks

Tuesdays, 3pm - 3:45pm

April 2 - May 14

No experience necessary! Use GarageBand  
along with pro-level synthesizers to explore  
sounds, create music, and perform!

A project-based, hands-on, collaborative STEM learning experience for young musicians (and aspiring musicians). With one-on-one help from real electronic musicians, students will use modular synthesizers, analog synthesizers, drum machines, and GarageBand to create and perform tracks in whatever genre/style they wish! Whether your student is already producing music at home or has no music experience whatsoever, this class will empower them to explore their musical interests and talents while gaining practical knowledge about the technological side of music production.
